Food Technology Project

Dear Parents,

We are excited to inform you that next week, your child will be participating in a food technology project focused on creating a healthy dip. During the week commencing 17th June, pupils will have the opportunity to taste various shop-bought dips and then design and evaluate their own healthy versions.

Our lessons will include important topics such as food hygiene and preparation. We will provide all necessary ingredients and ensure that any food intolerances are checked and accommodated.

If you have any concerns or specific requirements, please do not hesitate to speak with your child's teacher.

Many thanks for your ongoing support.

Kind regards,

Mrs Low, Miss Bridgeman and the Year 4 team.
